

INVESTMENT STRATEGY

Spatium Capital's investment strategy is a quantitative approach that uses end-of-day-adjusted data through the investment manager's proprietary filters to capitalise on the frequent short-term price dislocations in equity markets.

The Spatium Small Companies Fund¹ is an Australian ASX300 long-only, relative return fund that seeks to construct, on average, a portfolio of 25-to-40 positions on an equally weighted basis. This approach results in an average portfolio holding period of 30-to-45 days.

¹Inception was 1 July 2018. Total returns are calculated using the sell (exit) price, net of fees, gross of tax, and assume reinvestment of distributions. Figures showing a period of less than one year have not been adjusted to show an annual total return. Figures for periods of greater than one year are shown on a per annum compound basis. Past performance is not a reliable indicator of future performance.

²Target returns of 5% p.a. above the Benchmark is a target only and not a forecast. Target returns are not guaranteed to occur. Past performance is not necessarily indicative of future performance.

³The performance fee only becomes payable where the Fund has exceeded the benchmark return, the Fund has achieved a positive result and the Fund has met the high water mark.
